

EXP.NO: 1

Web Page Creation using HTML

Date:

AIM:

To create a web page that embeds a map with hotspots, frames, and links. The web page should be designed using HTML, incorporating embedded, external, and inline CSS for styling. This exercise aims to enhance understanding of integrating multimedia elements like maps, creating interactive hotspots, and organizing content using frames while applying different CSS techniques for styling.

ALGORITHM:

Create the HTML structure:

- Set up the basic HTML document with `<!DOCTYPE html>`, `<html>`, `<head>`, and `<body>` tags.

- In the `<head>`, link the external CSS file (`<link>` tag), define the title, and include any metadata.

- In the `<body>`, create the necessary elements:

- o Frames: Use the `<frameset>` tag to create a frame layout (for older browsers, use `<iframe>` instead).

- o Map: Use the `<img>` tag to display a map.

- o Hotspots: Create clickable regions using the `<map>` and `<area>` tags.

- o Links: Add hyperlinks (`<a>`) to navigate to different parts of the page or external sites.

- o

Create CSS Styles:

- External CSS: In a separate file, define styles such as colors, fonts, and layout for the

entire page.

- Inline CSS: Use the style attribute within specific tags to apply styles (e.g., in `<div>` or `<p>` tags).

- Embedded CSS: Inside the `<style>` tag in the `<head>`, define styles for specific

elements like the map, frames, and text.

Map with Hotspots:

- Use the <map> tag to create an image map.
- Define the <area> tag for each hotspot, specifying the coordinates (e.g., coords="x,y,x2,y2") for clickable areas on the map.

Frames:

- Use the <iframe> tag for embedding external content like a map or another webpage,
- with attributes such as src for the URL, width, and height.

Add Links:

- Inside the <body>, use the <a> tag to create links for navigation (for example, to link to specific parts of the page or external sites).

Test the Page:

- Test the webpage to check the functionality of frames, hotspots, and links. Ensure that the map hotspots are clickable and the linked content displays correctly.
- Ensure that the styles are applied properly using inline, embedded, and external CSS.

CODE:

```
<!DOCTYPE html>
<html>
<head>
<title>Chennai Map Explorer</title>
<link rel="stylesheet" href="style.css">
<style>
.header{
Text-align:center;
Padding:20px;
}
```

```
.map-container{
Width:90%;
Max-width:900px;
Margin:auto;
}

.map-frame{
Width:100%;
Height:500px;
Border:0;
Border-radius:8px;
}

.content{
Width:90%;
Margin:auto;
Margin-top:30px;
Line-height:1.6;
Text-align:center;
}

.directory{
Margin-top:15px;
Font-size:18px;
}

</style>

</head>

<body>

<div class="header">

<h1>Chennai City Map</h1>

<p style="color:#444;">Interactive Map with Directory Link</p>

</div>
```

```
<div class="map-container">
<iframe class="map-frame"
Src=https://www.google.com/maps?q=chennai&output=embed>
</iframe>
</div>
```

```
<div class="content">
<div class="directory">
<a href=https://en.wikipedia.org/wiki/Chennai target="_blank">
View Chennai Information (Wikipedia)
</a>
</div>
```

```
<h2>About Chennai</h2>
<p>
```

Chennai is the capital of Tamil Nadu and one of India's major metropolitan cities. It is a leading hub for information technology, automobile manufacturing, education, healthcare, and cultural heritage.

```
</p>
```

```
<h3>How to use</h3>
```

```
<ul>
<li>Use the embedded map to zoom and explore Chennai.</li>
<li>Click the directory link above to open Chennai Wikipedia.</li>
</ul>
```

```
</div>
```

```
</body>
```

```
</html>
```

```
Body{  
Margin:0;  
Background:white;  
Font-family:Segoe UI,Arial;  
Color:black;  
}
```

```
H1{  
Margin-bottom:5px;  
}
```

```
H2{  
Border-bottom:2px solid black;

Font-weight:600;  
}
```

```
A:hover{
Text-decoration:underline;
}
```

```
UI{
Padding-left:20px;
Text-align:left;
Display:inline-block;
}
```

```
Li{
Margin-bottom:6px;
}
```

Output:

Chennai City Map

Interactive Map with Directory Link

[View Chennai Information \(Wikipedia\)](#)

About Chennai

Chennai is the capital of Tamil Nadu and one of India's major metropolitan cities. It is a leading hub for information technology, automobile manufacturing, education, healthcare, and cultural heritage.

How to use

- Use the embedded map to zoom and explore Chennai.
- Click the directory link above to open Chennai Wikipedia.

Result:

Html Page is created with embedded Chennai map along with hot spot, frames & links.
